

## VALANCE CLIP STYLE REFERENCE CHART

The following images show you the different clips available for the different applications of the Standard & Crown Valances and how the components clip onto each style.

### STANDARD FAUXWOOD VALANCE

**You will receive 2 right angle return clips per valance, as well as a couple valance clips per valance.**

*For the standard fauxwood valance you will receive 1 of 2 valance clip styles depending on availability.*

*You may trim the return clip if return is too small, so clip does not protrude.*

The **return clips** slides into the groove both on the return and on the valance. Typically you will receive the hidden **valance clip** which is the smaller one with the 2 teeth looking clips. This gets clipped in the groove on the back of the valance. The larger one will be sent if the hidden valance clip is unavailable and just clips over the top and bottom edge of the valance.

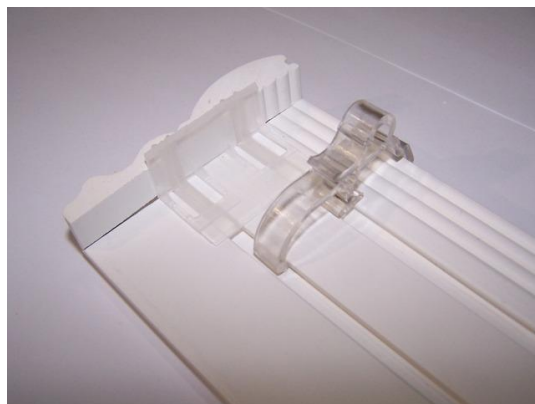

### CROWN FAUXWOOD VALANCE – DOUBLE GROOVE

**You will receive 2 double right angle return clips per valance, as well as a couple hidden valance clips per valance.**

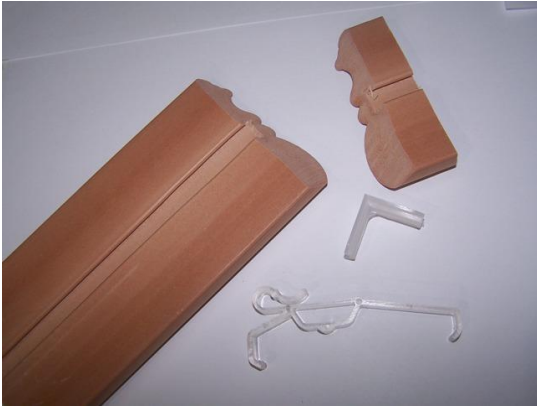

*The longer end of the return clip slides onto the valance and the shorter end slides onto the return.*

*You may trim the return clip if return is too small, so clip does not protrude.*

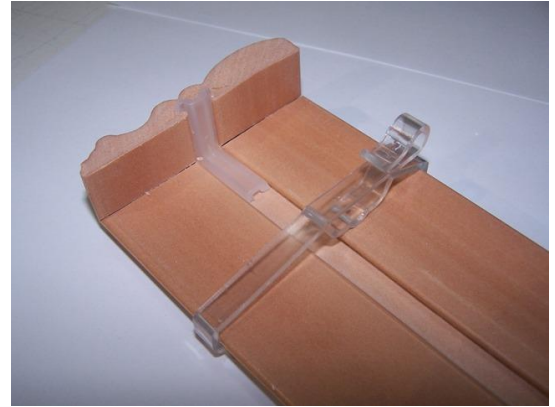

The **double return clips** slides into the double groove both on the return and on the valance. The **valance clip** just clips over the top (there will be a groove on the top edge of the valance) and bottom of the clip clips into the bottom groove as shown in the above image. The center piece on the clip just rests over the other groove (*it does not clip in*).

## CROWN FAUXWOOD VALANCE – SINGLE GROOVE

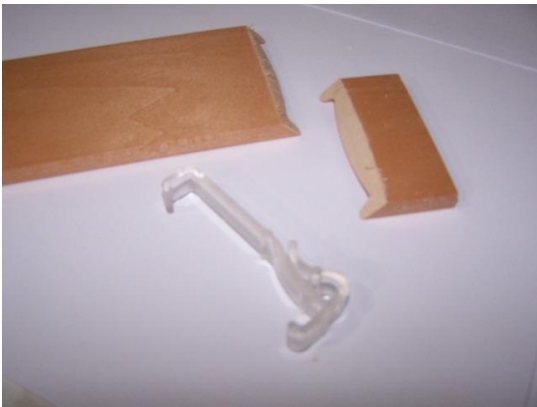

You will receive 2 right angle return clips per valance, as well as a couple valance clips per valance.

*You may trim the return clip if return is too small, so clip does not protrude.*

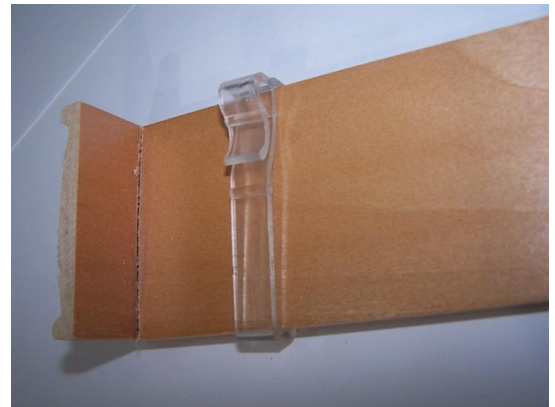

The **return clips** slide into the groove both on the return and on the valance. The **valance clip** just clips over the top and bottom edge of the valance.

## STANDARD WOOD VALANCE

You will receive a couple of valance clips, per valance.

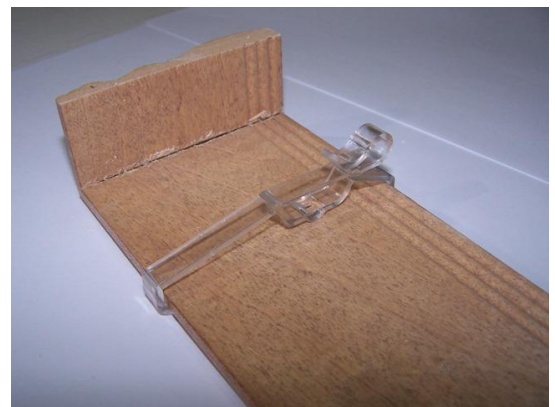

The **returns** need to be glued on with hot glue. The **valance clip** just clips over the top and bottom edge of the valance.

## CROWN WOOD VALANCE

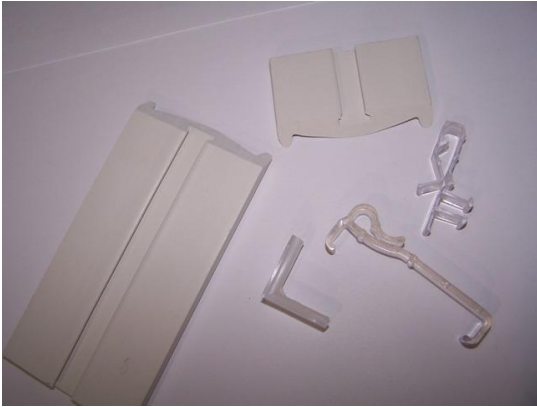

You will receive a couple of valance clips, per valance.

The **returns** need to be glued on with hot glue. The **valance clip** just clips over the top and bottom edge of the valance.

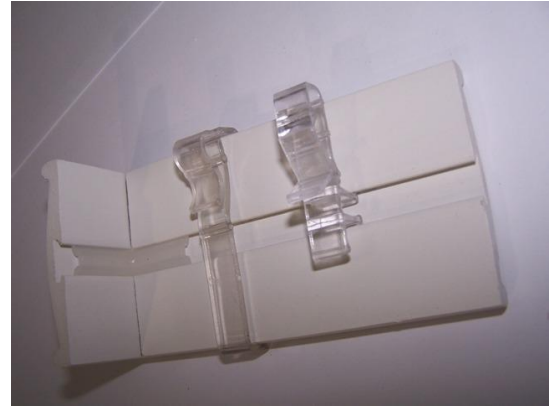

## STANDARD FAUXWOOD VALANCE

**You will receive 2 right angle return clips per valance, as well as a couple valance clips per valance.**

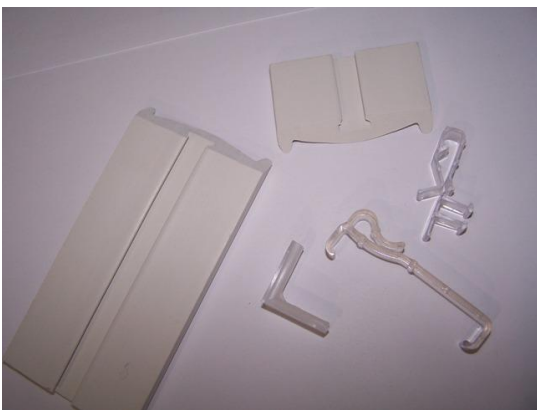

*For the standard fauxwood valance you will receive 1 of 2 valance clip styles depending on availability.*

*You may trim the return clip if return is too small, so clip does not protrude.*

The **return clips** slides into the groove both on the return and on the valance. Typically you will receive the hidden **valance clip** which is the smaller one with the 2 teeth looking clips. This gets clipped in the groove on the back of the valance. The larger one will be sent if the hidden valance clip is unavailable and just clips over the top and bottom edge of the valance.

## STANDARD FAUXWOOD VALANCE

**You will receive 2 right angle return clips per valance, as well as a couple valance clips per valance.**

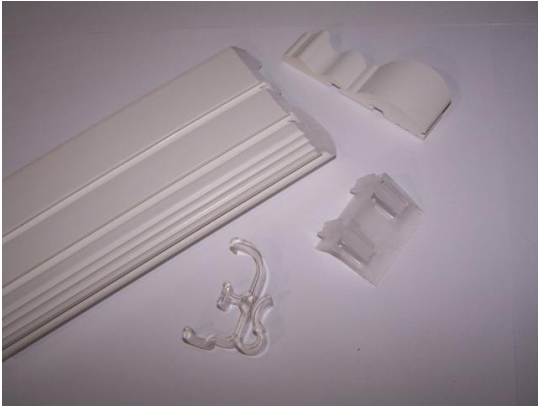

*For the standard fauxwood valance you will receive 1 of 2 valance clip styles depending on availability.*

*You may trim the return clip if return is too small, so clip does not protrude.*

The **return clips** slides into the groove both on the return and on the valance. Typically you will receive the hidden **valance clip** which is the smaller one with the 2 teeth looking clips. This gets clipped in the groove on the back of the valance. The larger one will be sent if the hidden valance clip is unavailable and just clips over the top and bottom edge of the valance.

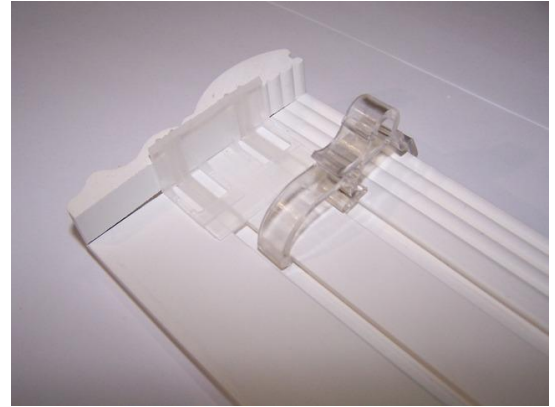

## CROWN FAUXWOOD VALANCE – DOUBLE GROOVE

**You will receive 2 double right angle return clips per valance, as well as a couple hidden valance clips per valance.**

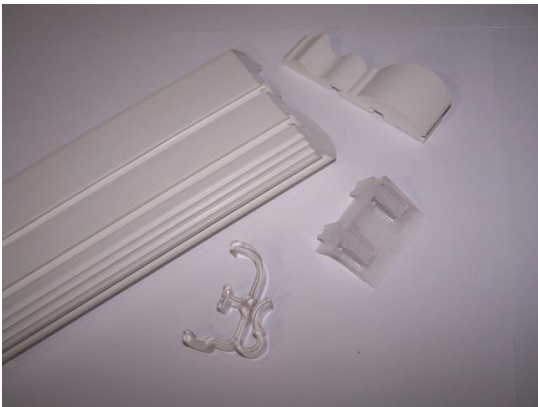

*The longer end of the return clip slides onto the valance and the shorter end slides onto the return.*

*You may trim the return clip if return is too small, so clip does not protrude.*

The **double return clips** slides into the double groove both on the return and on the valance. The **valance clip** just clips over the top (there will be a groove on the top edge of the valance) and bottom of the clip clips into the bottom groove as shown in the above image. The center piece on the clip just rests over the other groove (*it does not clip in*).

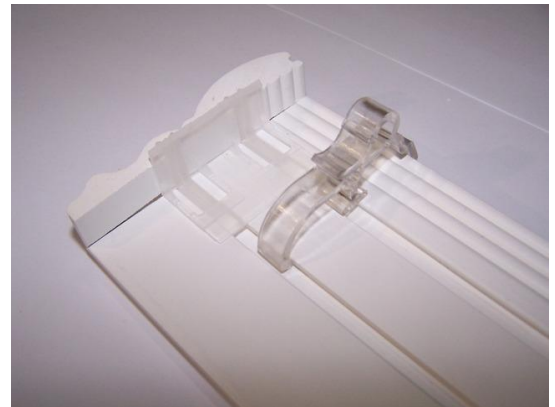

## CROWN FAUXWOOD VALANCE – DOUBLE GROOVE

**You will receive 2 double right angle return clips per valance, as well as a couple hidden valance clips per valance.**

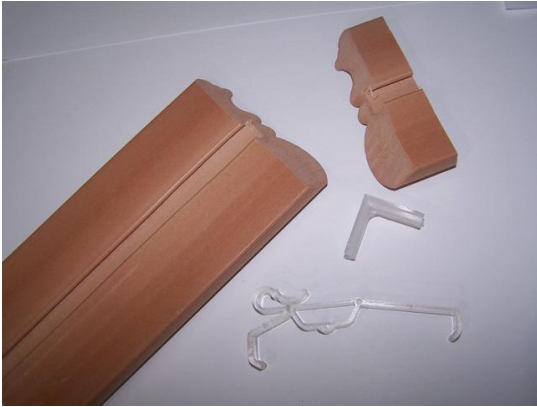

*The longer end of the return clip slides onto the valance and the shorter end slides onto the return.*

*You may trim the return clip if return is too small, so clip does not protrude.*

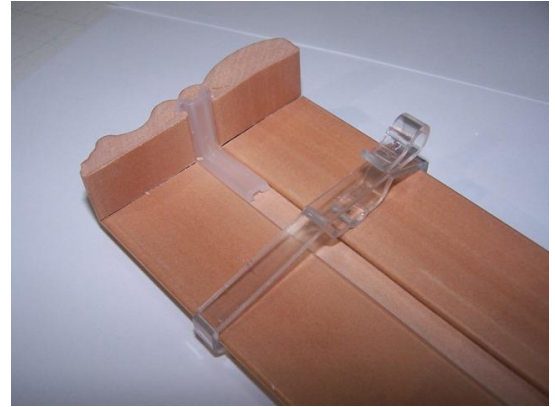

The **double return clips** slides into the double groove both on the return and on the valance. The **valance clip** just clips over the top (there will be a groove on the top edge of the valance) and bottom of the clip clips into the bottom groove as shown in the above image. The center piece on the clip just rests over the other groove (*it does not clip in*).

## CROWN FAUXWOOD VALANCE – SINGLE GROOVE

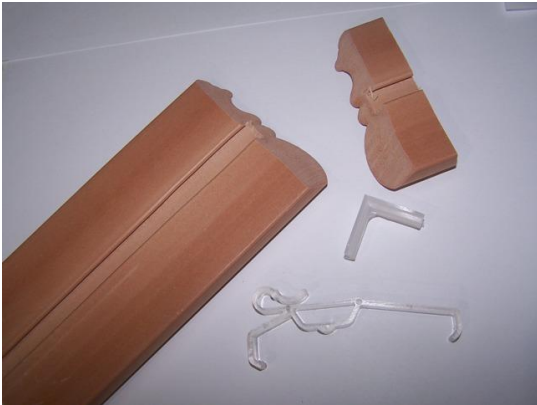

**You will receive 2 right angle return clips per valance, as well as a couple valance clips per valance.**

*You may trim the return clip if return is too small, so clip does not protrude.*

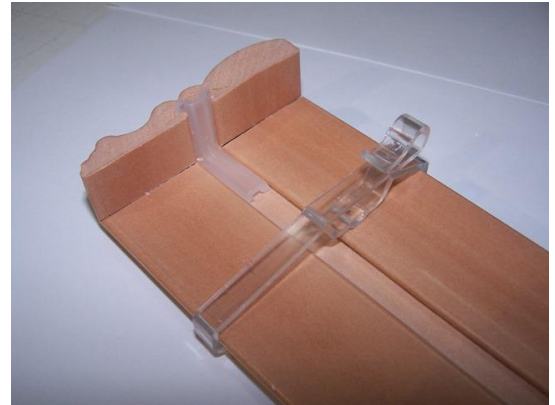

The **return clips** slide into the groove both on the return and on the valance. The **valance clip** just clips over the top and bottom edge of the valance.

## CROWN FAUXWOOD VALANCE – SINGLE GROOVE

**You will receive 2 right angle return clips per valance, as well as a couple valance clips per valance.**

*You may trim the return clip if return is too small, so clip does not protrude.*

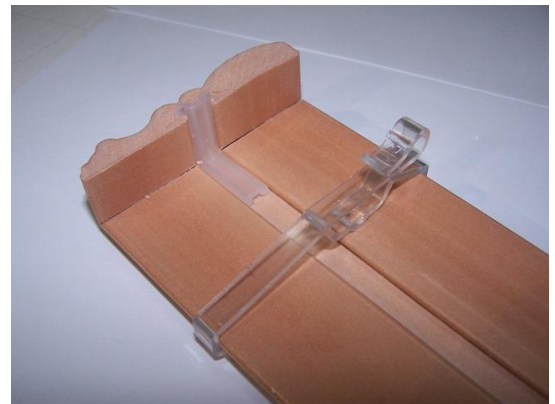

The **return clips** slide into the groove both on the return and on the valance. The **valance clip** just clips over the top and bottom edge of the valance.

## CROWN FAUXWOOD VALANCE – SINGLE GROOVE

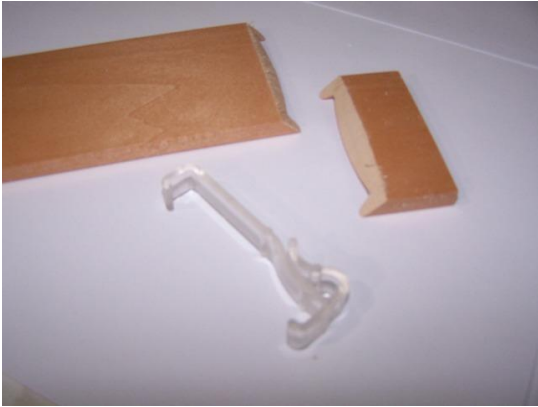

**You will receive 2 right angle return clips per valance, as well as a couple valance clips per valance.**

*You may trim the return clip if return is too small, so clip does not protrude.*

The **return clips** slide into the groove both on the return and on the valance. The **valance clip** just clips over the top and bottom edge of the valance.

**STANDARD WOOD VALANCE**

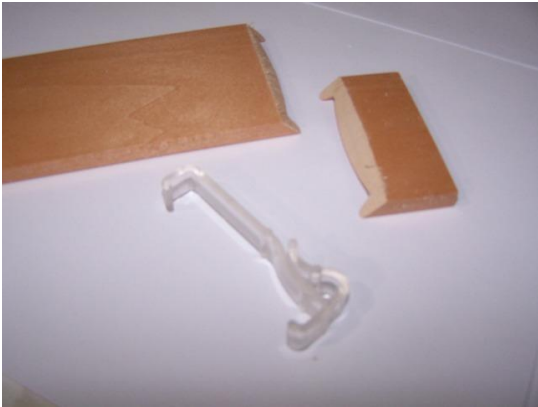

You will receive a couple of valance clips, per valance.

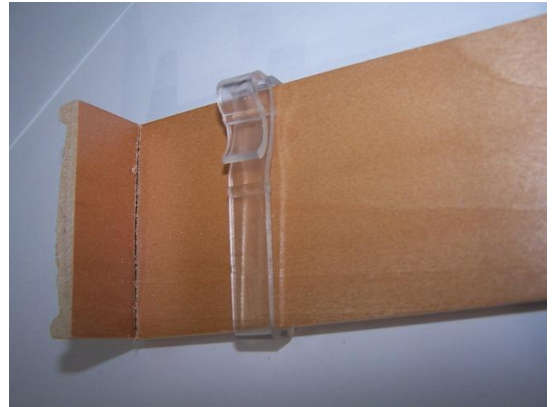

The **returns** need to be glued on with hot glue. The **valance clip** just clips over the top and bottom edge of the valance.

**STANDARD WOOD VALANCE**

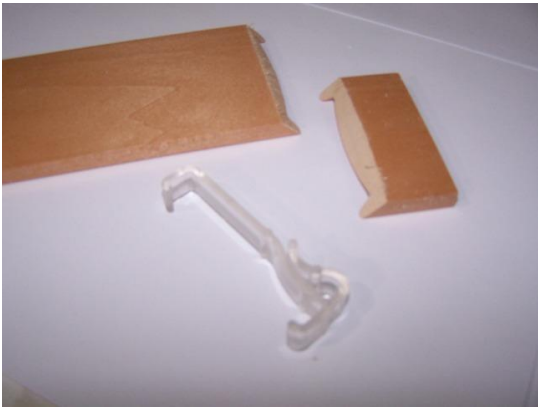

You will receive a couple of valance clips, per valance.

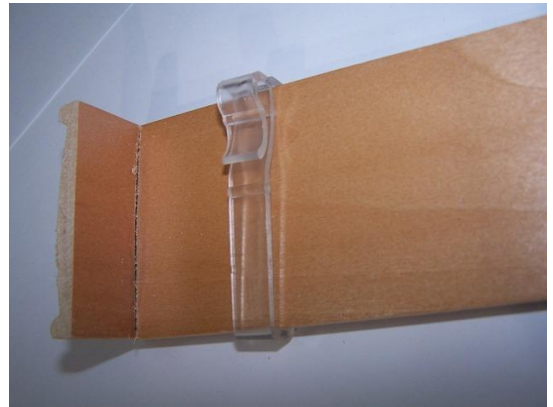

The **returns** need to be glued on with hot glue. The **valance clip** just clips over the top and bottom edge of the valance.

**STANDARD WOOD VALANCE**

You will receive a couple of valance clips, per valance.

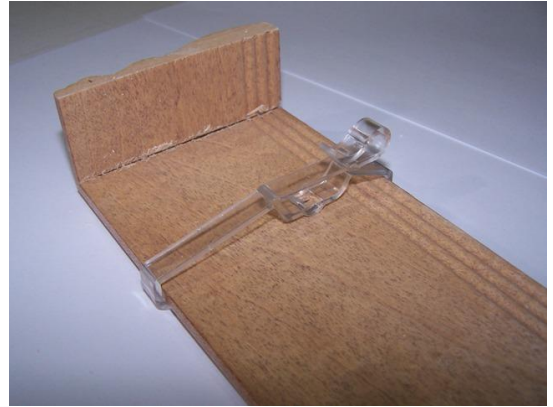

The **returns** need to be glued on with hot glue. The **valance clip** just clips over the top and bottom edge of the valance.

**CROWN WOOD VALANCE**

You will receive a couple of valance clips, per valance.

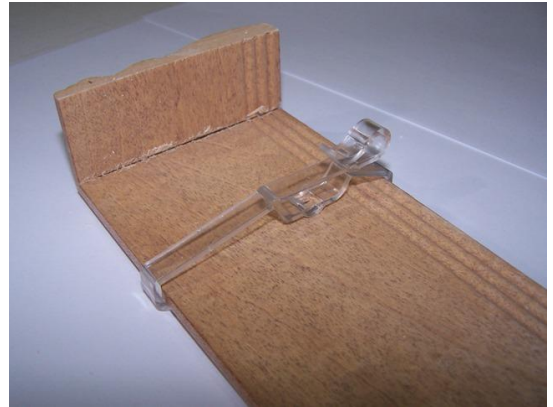

The returns need to be glued on with hot glue. The valance clip just clips over the top and bottom edge of the valance.

**CROWN WOOD VALANCE**

You will receive a couple of valance clips, per valance.

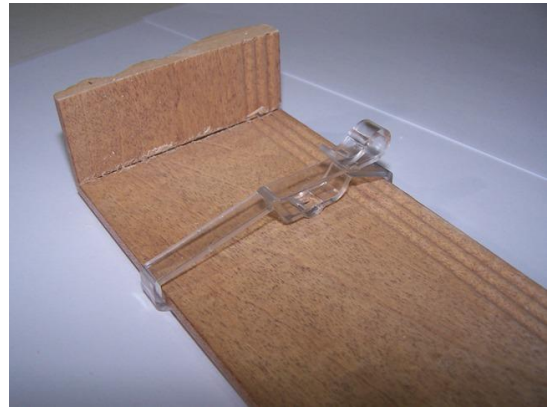

The returns need to be glued on with hot glue. The valance clip just clips over the top and bottom edge of the valance.

**CROWN WOOD VALANCE**

You will receive a couple of valance clips, per valance.

The returns need to be glued on with hot glue. The valance clip just clips over the top and bottom edge of the valance.
